

Wildland Urban Interface (WUI)

Saturday, August 13th, 2011

9:00am to 12:00pm

**San Carlos City Council Chambers
600 Elm Street**

Did You Know???

In San Mateo County, the following 9 cities are within the Wildland Urban Interface: San Carlos, Belmont, Redwood City, San Mateo, Half Moon Bay, Hillsborough, Pacifica, and Portola Valley.

Why Attend???

California has one of the most severe wildland fire problems in the world because of: Population, Vegetation, Topography, and Climate. In wildland/urban interface areas, wildfire isn't a matter of "IF"; it's a matter of "WHEN". This Wildland Urban Interface training was developed to provide CERT members with an increased knowledge about interface dangers and how as a team they can prepare. The presentation will cover the following: Interface dangers, including basic fire behavior and environmental influences; wildland fire safety, including how to prepare your home, yards and neighborhoods; and what to do when a wildland fire is threatening homes and your community.

Join us...bring a friend...be prepared...

Presented by Belmont-San Carlos Fire Department

Refreshments will be served

Please RSVP to:
